

Catalyzing Strategic Growth for Emerging Life Science Companies

About Us

Life Science Works is dedicated to propelling the next wave of breakthroughs in human health. Specializing in start-ups and small businesses, we offer professional services and business consulting tailored to life science innovators. Whether your focus is biotechnology, drug development, medical devices, or agricultural advancements, we provide critical and strategic support you need to grow.

Our expertise spans across:

• Accelerating Research and Development:

We guide you in securing SBIR/STTR non-dilutive grants, optimizing your operations, and reaching your strategic goals.

• Strengthening Corporate Leadership:

We assist in building and maintaining dynamic corporate boards, enhancing governance structures, and strategic planning.

• Independent Technology Reviews:

Offering unbiased evaluations of technologies and pipelines to attract and inform investors.

• Board Preparation Boot Camps for Life Scientists:

Equipping future board members with the basic knowledge and resources to start a search for corporate Board service.

Why Choose Life Science Works?

• Expert Team:

Our seasoned professionals bring decades of experience in helping to grow and to lead life science companies. We've navigated the challenges and can expertly guide you through them.

• SBIR/STTR Specialists:

Our team's extensive expertise in securing non-dilutive funding through SBIR/STTR programs means we tailor our strategies to meet your specific needs. And, as former science agency leaders, we know what reviewers want to see in your grant application.

• Seasoned Board Members & Investors:

With many of us serving on for-profit boards and as investors, we offer invaluable insights into corporate strategy, operations, and financing.
